JMeter Objective Type Questions List

1. **Jmeter** is used for
A. Testing Web Application
B. Executing Web Application
C. Searching Web Application
D. None of this

2. Is Jmeter open source software?
A. No
B. Yes

3. Jmeter is not used for
A. Database server test
B. Functional test
C. Accessibility Testing
D. Testing web application

4. Jmeter does not support
A. Load Testing
B. Functional Testing
C. Distributed Testing
D. Monkey Testing

5. BSF stands for
A. Bean Scripting Framework
B. Bit Scripting Framework
C. Bean Searching Framework
D. Bean Server Framework

6. Select INVALID configuration element in Jmeter.
A. HTTP Request Defaults
B. FTP Request Defaults
C. HTTP Cookie Manager
D. FTP Cookie Manager

7. Jmeter can be used to test performance of
A. Only static resources
B. Only dynamic resources
C. Both static and dynamic
D. None of above

8. Stress testing is possible by Jmeter?
A. No
B. Yes

9. Select INVALID timer in Jmeter

- A. Uniform Random Timer
- B. Gaussian Random Timer
- C. Constant Timer
- D. Continue Timer

10. Which assertion is not used in Jmeter?

- A. Duration
- B. Size
- C. XML
- D. Web

11. Which is the assertion tests where each server response was received within a given amount of time?

- A. Duration
- B. Size
- C. XML
- D. Response

12. Select Status Code for Page not Found Error

- A. 200
- B. 404
- C. 302
- D. 502

13. Logic Controllers determine

- A. The Types of requests that are executed
- B. The source of requests that are executed
- C. The order in which user request are executed

14. Select INVALID controller in Jmeter

- A. Simple controller
- B. Static controller
- C. Random controller
- D. Loop controller

15. Select controller which makes the user request run specified number of times

- A. Loop controller
- B. Random controller
- C. Logic controller
- D. Recording controller

16. Select processor which executes some action before making Sampler Request.

- A. Pre-processor
- B. Post-processor
- C. Microprocessor

17. Select testing which uses multiple systems to perform stress testing.

- A. Load Testing
- B. Functional Testing
- C. Distributed Testing
- D. web application testing

18. Jmeter supports all the OS supported by Java application

- A. TRUE
- B. FALSE

19. Timer which delays each user request for a random amount of time.

- A. Uniform Random Timer
- B. Constant Random Timer
- C. Constant Timer
- D. Gaussian Random Timer

20. What is a component of Distributed Jmeter Test

- A. Master
- B. Slave
- C. Target
- D. All of The Above
